This report is a self-assessment tool. It is not a medical or psychological diagnosis.

Your result

63 / 80

High average (IQ 110–119)

Normed IQ 115 · percentile 84

Low Very high

What your answers say

Written by Claude (Anthropic) from your answers.

Thank you for taking the time to complete this Complete IQ Assessment, and congratulations on engaging so thoughtfully with a process that isn't always easy to sit through. Reflecting on how your mind works can bring up all sorts of feelings—curiosity, pride, maybe even a little vulnerability—and all of those reactions are completely normal. Whatever led you here, know that exploring your cognitive strengths is a positive and constructive step, not something to feel anxious about.

Your results show a normed IQ score of 115, which falls above the average range and suggests strong overall reasoning and problem-solving abilities. Looking at the breakdown, your verbal score of 18 stands out as a particular strength, suggesting comfort with language, vocabulary, and expressing ideas clearly. Your visual (16) and spatial (15) scores are also solid, pointing to good abilities in interpreting images, patterns, and spatial relationships. Your numerical score of 14, while still within a healthy range, is comparatively your area with the most room for growth. It's worth remembering that these numbers represent a snapshot from one testing session, not a fixed ceiling on your potential—cognitive abilities are dynamic and can be nurtured over time.

Given this profile, a few gentle suggestions come to mind. First, consider leaning into activities that stretch your numerical reasoning in low-pressure, enjoyable ways—things like puzzle apps, budgeting games, or even casual strategy games involving numbers. Second, since verbal reasoning is a clear strength, you might find fulfillment in pursuits like writing, discussion groups, or reading that challenge and celebrate that skill further. Third, activities that blend spatial and visual thinking, such as design work, drawing, or building/assembly projects, could help you continue developing a well-rounded cognitive toolkit while having fun.

Please remember that this assessment is a screening tool designed to offer insight, not a clinical diagnosis or a complete picture of your intellectual or personal worth. If you have questions about these results, or if you're curious about how your cognitive profile relates to learning, work, or daily life, connecting with a licensed psychologist or neurodevelopmental specialist can offer clarity and personalized guidance. You've taken a meaningful first step, and there's real hope and opportunity in learning more about yourself.

Next steps

Pick one or two. Regularity matters more than duration.

For a recognised IQ

Only an assessment with a psychologist (WAIS for adults, WISC for children) gives a recognised IQ, for example for school, work or Mensa.

- This report is an estimate compared with the people who took the test on this site.
- A psychologist also looks at your whole profile, not just one number.

This report is a self-assessment tool. It does not replace an assessment by a professional. For a reliable diagnosis, see a neuropsychologist, a psychiatrist or another qualified healthcare professional.

Your answers

Each answer and the points it adds.

#	Question	Your answer	Pts
1	Which shape completes the pattern?	C	**0**
2	What completes the fill-progression?	C	**0**
3	How many shapes belong in the missing cell?	C	**0**
4	What belongs in place of the question mark?	C	**0**
5	Which option continues the size progression?	C	**0**
6	Which option completes the inner-shape pattern?	C	**1**
7	Which option completes the border-thickness progression?	C	**0**
8	How many nested shapes belong in the missing cell?	C	**0**
9	In which direction does the missing arrow point?	Left ←	**0**
10	The number of sides increases across each row. What shape belongs in the missing cell?	Triangle (3 sides)	**0**
11	In a 3×3 grid, each row contains a circle, a square and a triangle. Row 3 has: circle, triangle, ___	Triangle	**0**
12	Each column has exactly one filled shape. In column 3, the filled shape is in row 1. Row 3, column 3 should be:	Empty	**1**
13	A pattern rotates 90° clockwise at each step. After 4 steps it returns to its original position. Starting pointing UP, after 3 steps it points:	Left ←	**1**
14	In a 3×3 matrix, size depends on the row (row 1: small, row 2: medium, row 3: large) and shape depends on the column (column 1: circle, column 2: square, column 3: triangle). Row 3, column 2 must be:	Large circle	**0**
15	A grid has black dots that move one cell to the right each row. If the dot starts at column 1 in row 1, where is it in row 4?	Column 3	**0**
16	Each row sums to 6 shapes total. Row 1: 1+2+3. Row 2: 2+3+___. What fills row 2, column 3?	2	**0**
17	A shape is reflected horizontally (mirrored left-right). If an arrow points to the upper-right (↗), its mirror image points to:	Lower right ↘	**0**
18	Each row has the same 3 shapes but in different positions. The shape missing from row 3 is always in the center in row 1 and on the right in row 2. In row 3 it is:	On the right	**0**
19	In a 3×3 grid, the number of dots per cell follows: row 1 = 1,2,3 - row 2 = 2,3,4 - row 3 = 3,4,___	5	**1**

#	Question	Your answer	Pts
20	A symmetric pattern has a line of symmetry running vertically. The left half shows: top-left = filled circle, center-left = empty square, bottom-left = filled triangle. The bottom-right cell must be:	Empty square	**0**
21	Hot is to Cold as Day is to ___	Sun	**0**
22	Book is to Library as Painting is to ___	Museum	**1**
23	Doctor is to Patient as Lawyer is to ___	Crime	**0**
24	Fish is to Water as Bird is to ___	Feathers	**0**
25	Glove is to Hand as Shoe is to ___	Leg	**0**
26	Author is to Book as Composer is to ___	Concert	**0**
27	Sun is to Day as Moon is to ___	Light	**0**
28	Teacher is to School as Chef is to ___	Food	**0**
29	Pen is to Write as Knife is to ___	Cut	**1**
30	Eye is to See as Ear is to ___	Listen	**0**
31	Which word does NOT belong? Dog - Cat - Bird - Table	Dog	**0**
32	Which word does NOT belong? Paris - London - Berlin - Apple	Paris	**0**
33	Which word does NOT belong? Red - Blue - Green - Monday	Green	**0**
34	Which word does NOT belong? Piano - Violin - Guitar - Hammer	Guitar	**0**
35	Which word is closest in meaning to "Happy"?	Tired	**0**
36	Which word is closest in meaning to "Brave"?	Shy	**0**
37	Which word is the OPPOSITE of "Ancient"?	Old	**0**
38	Which does NOT belong to the same category? Eagle - Sparrow - Penguin - Dog	Dog	**1**
39	Which does NOT belong? Rose - Tulip - Sunflower - Carrot	Carrot	**1**
40	Captain is to Ship as Pilot is to ___	Airplane	**1**
41	What comes next? 2 - 4 - 8 - 16 - ___	32	**1**
42	Complete: 1 - 4 - 9 - 16 - 25 - ___	34	**0**
43	What is next? 1 - 1 - 2 - 3 - 5 - 8 - ___	12	**0**
44	What is next? 3 - 6 - 11 - 18 - 27 - ___	36	**0**

#	Question	Your answer	Pts
45	What comes next? 1 - 3 - 6 - 10 - 15 - ___	20	**0**
46	What is next in this prime sequence? 2 - 3 - 5 - 7 - 11 - ___	13	**1**
47	What comes next? 1 - 2 - 4 - 7 - 11 - ___	16	**1**
48	What comes next? 256 - 128 - 64 - 32 - ___	16	**1**
49	What is the missing number? 3 - ___ - 9 - 12 - 15	6	**1**
50	What letter comes next? A - C - F - J - O - ___	V	**0**
51	3 is to 9 as 4 is to ___	20	**0**
52	1 is to 1, and 2 is to 8. So 3 is to ___	9	**0**
53	What is 50% of 80?	50	**0**
54	What is 3 × 7 – 6?	12	**0**
55	What is 12 × 12?	124	**0**
56	Which number does NOT belong? 2 - 4 - 6 - 9 - 10 - 12	6	**0**
57	What is 1000 – 237?	753	**0**
58	What is 7 × 14 ÷ 2?	42	**0**
59	5 workers make 5 chairs in 5 days. How many days does 1 worker need to make 1 chair?	10	**0**
60	If x + 5 = 12, what is 2x?	7	**0**
